

Bio

From the many years Priscilla Tor has worked in family service centres and long term care and community settings, Priscilla has developed a strong interest in supporting families who care for individuals with neurological differences or loss by dementia. She also feels privileged to have learnt from them and developed her gift to help therapeutically.

Priscilla finds joy in being a part of creating new possibilities together with individuals, couples and families, facilitating them to craft their preferred paths and experience quality of life, and celebrating the beauty of self and family with them.

Outside of work, her loving spouse and two happy children reaching young adulthood are her world.
